

KRA – Experience Manager (Customer Interaction, Vetic Clinics)

****Role Purpose:**** Be the primary point of contact for pet parents at the clinic — owning their experience from arrival to departure, ensuring every interaction feels warm, professional, and resolves their needs, without owning clinic operations, staffing, or medical delivery.

1. Customer Interaction & Service Quality (35%)

- Greet, guide, and assist every walk-in/appointment customer through their clinic visit
- Ensure zero customers leave without clarity on next steps (billing, prescriptions, follow-up, discharge instructions)
- Maintain CSAT score $\geq$ target (e.g. 90%+) based on post-visit feedback
- Handle on-ground queries (wait time, doctor availability, billing doubts) with immediate, empathetic response

2. Complaint & Escalation Handling (25%)

- First point of contact for any dissatisfaction — resolve on-spot wherever possible
- Log every complaint/feedback in CRM same-day, categorized by type (wait time, staff behavior, billing, medical concern, etc.)
- Escalate unresolved/sensitive issues to Clinic Manager or CX lead within defined TAT
- Track and report repeat complaint themes for the clinic

3. Customer Communication & Follow-up (20%)

- Manage proactive communication: appointment reminders, delay notifications, post-visit check-ins
- Ensure pet parents are informed during any wait (queue status, expected time)
- Own post-visit follow-up calls/messages (vaccination due, post-op recovery check, review requests)
- Support retention by nudging first-time customers toward repeat visits/membership

4. Feedback Loop & Reporting (15%)

- Submit daily feedback log and weekly experience summary to CX/Founder's Office
- Surface actionable insights (not just data) — what's causing friction, what's working
- Participate in monthly CX review with recommendations for service improvement

5. Brand & Standards Adherence (5%)

- Follow Vetic's communication tone/script standards in every interaction
- Maintain professional appearance and demeanor as the face of the clinic
- Ensure customer data handling follows privacy protocol

****Key distinction from Clinic Manager:**** This role does NOT own staffing rosters, inventory, equipment uptime, or medical/operational SOPs — it owns the "customer's experience layer" of the visit and interfaces with Clinic Manager/Ops for anything operational.

Want this as a formatted doc, or should I also draft the ****reporting relationship**** (who this role reports to — Clinic Manager vs. direct to CX/Founder's Office) since that affects how a few KRAs above get worded?
